(+84) 834-105-650

I'm a UI/UX designer with above 5 years in the industry. I love to focus into the detail of every interface design. With many things such as pattern, grid, color, typography... the design itself can covey a unique voice.
Also I can help the design work correctly in real life by working hard with the process part, not just the visual part. Feel free to contact me if you have more question !
